# Personal Information

Name: Katheryne Ramírez

Program: Software Analysis and Development

Training Center: SENA

City: Rionegro, Colombia

I like technology and I want to learn how to create software. This program helps me to grow and prepare for my future job

## Program Overview

The Software Analysis and Development program trains future professionals in areas such as:

- Software engineering fundamentals
- Web and mobile development
- Databases and information systems
- Software life cycle and agile methodologies
- Technical English for IT

## My Expectations and Interests

I chose this program because I'm passionate about:

- Creating digital solutions that improve people's lives
- Learning programming languages like Java, JavaScript, and SQL
- Designing intuitive and beautiful user interfaces
- Understanding how technology can support industries such as beauty and wellness

### My goal

*To become a full-stack developer*
